Contents of Vol. 176

ELECTRONICS AND OPTICS

Comparison of experimental and theoretical Fermi screening of charged impurities in degenerate semiconductors 1
A. J. Mendez (Los Angeles, CA, U.S.A.)

Thermal stability of TiN films deposited onto silicon substrates 7
J. M. Poitevin, D. Maheo and G. Lemperiere (Nantes, France)

Preparation and properties of diodes on low-resistivity zinc phosphide films 13
A. Haque, T. Dinh, N. Christoforou, D. E. Brodie and J. D. Leslie (Waterloo, Ontario, Canada)

Scattering of light in TiO_2 layers of broad band mirrors 25
E. Schmidt, H. Müller, P. Pertsch and D. Gäbler (Jena, G.D.R.)

Band gap narrowing and the band structure of tin-doped indium oxide films 33
L. Gupta, A. Mansingh and P. K. Srivastava (Delhi, India)

Tantalum oxide films for monolithic capacitor applications 45
M. A. Mohammed and D. V. Morgan (Cardiff, U.K.)

Improvements in the topography of AuGeNi-based ohmic contacts to n-GaAs 55
R. K. Ball (London, U.K.)

An iterative and consistent method for the complex refraction index calculation of absorbent thin films 69
M. García-Castañeda and H. Sánchez-Machet (Bogota, Colombia)

Transparent thin film thermocouple 73
M. Yust (Haifa, Israel) and K. G. Kreider (Gaithersburg, MD, U.S.A.)

Electrical properties of boron-doped hydrogenated amorphous silicon films prepared by glow discharge decomposition in dilute silane 79
O. S. Panwar, P. N. Dixit, A. Tyagi, T. Seth, B. S. Satyanarayan, R. Bhattacharyya and V. V. Shah (New Delhi, India)

METALLURGICAL AND PROTECTIVE COATINGS

Observations on aluminum diffusion and its effect on the specific contact resistance of Al/W/Si ohmic contact 91
Y. K. Fang and H. M. Yang (Tainan, Taiwan)

PREPARATION AND CHARACTERIZATION

Physical properties of arsenic-doped tin oxide thin films 99
S. R. Vishwakarma, J. P. Upadhyay and H. C. Prasad (Gorakhpur, India)

Preparation of amorphous thin films of $(Ti,V)O_2$ and $(Ti,Nb)O_2$ by r.f. sputtering 111
F. Lagnel, B. Poumellec (Orsay, France), J. P. Thomas, A. Ziani (Villeurbanne, France), M. Gasgnier (Meudon Principale, France), J. F. Marucco and C. Picard (Orsay, France)

The structure and composition of contacts made of Al(2%Cu)–TiW films on amorphized (100) silicon 131
S. Berger, Y. Komen (Haifa, Israel) and I. Blech (Santa Clara, CA, U.S.A.)

MOCVD of CdS onto (111) silicon substrates 143
J. L. Boone, S. A. Howard, D. D. Martin (Rolla, MO, U.S.A.) and G. Cantwell (Miami, OK, U.S.A.)

LANGMUIR–BLODGETT AND RELATED FILMS

On the formation of Langmuir–Blodgett films containing enzymes 151
D. G. Zhu, M. C. Petty, H. Ancelin and J. Yarwood (Durham, U.K.)

The stability of carboxylic acid Langmuir–Blodgett films as studied by the surface force technique 157
P. M. Claesson and J. M. Berg (Stockholm, Sweden)

GENERAL FILM BEHAVIOUR

Process of structure change in iron during titanium implantation 165
Y. Fukui (Saitama, Japan), Y. Hirose (Osaka, Japan) and M. Iwaki (Saitama, Japan)

LETTERS

Electron beam induced current technique imaging applied to surface reaction study L157
J. P. Dauchot and J. P. Dath (Mons, Belgium)

Electrical resistivity of nanocrystalline FeCo thin films. L161
J. P. Rivière, P. Bouillaud, J. F. Dinhut and J. Delafond (Poitiers, France)

ELECTRONICS AND OPTICS

Electrical characteristics of Ti–Si(100) interfaces 173
M. O. Aboelfotoh (Yorktown Heights, NY, U.S.A.), L. Stolt and C. S. Petersson (Stockholm, Sweden)

Optical properties of electron-beam-evaporated TiO_2 films. 181
K. Narasimha Rao, M. A. Murthy and S. Mohan (Bangalore, India)

Thermal stability of $TaSi_x/n$-GaAs metallizations 187
A. Paccagnella (Padova, Italy), C. C. Han, S. S. Lau (La Jolla, CA, U.S.A.), A. Gasparotto, A. Carnera and C. Canali (Padova, Italy)

METALLURGICAL AND PROTECTIVE COATINGS

Effect of laser nitridation on the electrochemical corrosion behaviour of 316 stainless steel 197
V. Naik, S. M. Chaudhari, S. M. Kanetkar, S. B. Ogale, A. P. B. Sinha (Poona, India) and C. K. Gupta (Bombay, India)

PREPARATION AND CHARACTERIZATION

An evaluation of some physical characteristics of $CdSnAs_2$ thin films 207
V. J. Rao, D. V. R. Raju and P. B. Kadam (Pune, India)

Thin film deposition by magnetron sputtering and determination of some physical parameters. . . 219
M. M. D. Ramos, J. B. Almeida, M. I. C. Ferreira and M. P. Dos Santos (Braga, Portugal)

The influence of structure on the piezoelectric properties of $BaTiO_3$ and $(BaSr)TiO_3$ thin films with a diffuse phase transition 227
Z. Surowiak (Sosnowiec, Poland), A. M. Margolin, I. N. Zakharchenko and S. V. Biryukov (Rostov-on-Don, U.S.S.R.)

Properties of CdS:In thin films grown by ionized deposition 247
A. Kuroyanagi and T. Suda (Kanagawa, Japan)

Crystallographic investigation of the iron films deposited obliquely by sputtering 255
K. Okamoto (Chiba, Japan), K. Hara, M. Kamiya (Kumamoto, Japan), T. Hashimoto (Tottori, Japan) and H. Fujiwara (Hiroshima, Japan)

Experimental and thermodynamical investigation of selective low pressure chemical vapour deposition of tungsten using WCl_6 as tungsten source 263
A. Hårsta and J.-O. Carlsson (Uppsala, Sweden)

Heat treatment in hydrogen gas and plasma for transparent conducting oxide films such as ZnO, SnO_2 and indium tin oxide 277
T. Minami, H. Sato, H. Nanto and S. Takata (Ishikawa, Japan)

LANGMUIR–BLODGETT AND RELATED FILMS

KVV auger spectra of tetracyanoquinodimethane semiconducting films 283
G. Martino, A. M. Mezzasalma, G. Mondio and G. Saitta (Messina, Italy)

GENERAL FILM BEHAVIOUR

A mechanistic study of SF_6 reactive ion etching of tungsten 289
G. Turban, J. F. Coulon and N. Mutsukura (Nantes, France)

Structural evolution in continuous variation-of-incidence thin films: a computer simulation 309
J.-S. Gau (Minneapolis, MN, U.S.A.) and B. Liao (Shenyang, China)

LETTERS

Optical properties of ZnO films deposited by r.f. sputtering on sapphire substrates L167
A. Valentini, A. Quirini (Bari, Italy) and L. Vasanelli (Lecce, Italy)

Reactions of r.f.-sputtered chromium films with gallium and tin L173
V. Simić and Ž. Marinković (Zemun-Belgrade, Yugoslavia)

Crystallization of β-WC_{1-x} in W-C multilayers L177
A. H. Carim (Albuquerque, NM, U.S.A.), A. F. De Jong (Eindhoven, The Netherlands) and Ph. Houdy (Limeil-Brévannes, France)

Electrical properties of copper-doped ZnTe films L183
A. Mondal, S. Chaudhuri and A. K. Pal (Calcutta, India)

AUTHOR INDEX 323
